

# *Sensitive* to your Doppler Demands

*Choose the DVM-4300 Doppler Volume Flowmeter*

- **Bidirectional Doppler and volume flowmeter**
- **Intraoperative volume flow documentation in mL/min.**
- **Documents vessel patency**
- **Diagnostic ratio determinations**
- **Postoperative evaluations**
- **Post-processing waveform analysis**
- **Integrated printer provides fast printing high resolution waveforms for immediate documentation**
- **Large visual real-time LCD - displays waveforms before printing**
- **Automatic gain and baseline control - no manual adjustments are required**
- **Non-invasive vascular testing capabilities**

*Bidirectional Doppler  
and Volume Flowmeter*
